

FLEXIBLE SUPPLY CHAIN SOLUTIONS

Following the global outbreak of coronavirus, MSC continues to adapt our services to support our customers and their supply chains during these challenging times. Please find below details of three flexible supply chain solutions available to support your business.

SUSPENSION OF TRANSIT (SOT)

To support our customers' supply chain continuity, MSC has implemented a flexible and cost-saving Suspension of Transit (SOT) programme. On request, MSC can deliver your cargo to a dedicated transshipment hub and store it here until you're ready to advise of release to its final destination. To find out more please [click here](#) or contact your usual MSC representative.

LONG-TERM OFF-DOCK STORAGE

At MSC we understand that during these unprecedented times, cargo storage is a challenge faced by many of our customers. That's why we've implemented a new, flexible, long-term storage solution. Ideal for customers who require additional warehousing or storage solutions, this service is offered across our UK-wide network and is designed to help our customers reduce quay rent costs. If you feel that this service would support your business, please contact your usual MSC representative who would be more than happy to support.

WAREHOUSING

MSC UK warehousing presents an economical alternative for customers looking for short-term warehousing solutions, with customs clearance support also on offer. To enquire about warehouse availability, please get in touch at GB014-cargo.solutionsl@msc.com, 01473 277 883.

Through these challenging times please be assured that MSC services continue to operate as usual and therefore your usual terms and conditions continue to apply unless you've requested one of the above services.
